

Century Petroleum Ltd. is pleased to announce that, effective June 9, we have acquired On-Site Petroleum Products.

Century Petroleum Ltd. has been a leading supplier of fuels and gasoline to the NYC Metropolitan area construction industry for over 39 years. The acquisition of On-Site Petroleum Products furthers that breadth of servicing the various industries that rely on wet hosing of construction equipment, such as cranes, lifts, backhoes, and light towers.

On-Site Petroleum, based in Brooklyn, NY, has been in business for over 30 years as a diesel and gasoline supplier in the NYC region, servicing the same range of customers as Century Petroleum. Our companies have shared the same values and missions; to provide our customers with a high level of service that very few businesses can match.

With this acquisition, the On-Site customers will now be able to receive products traditionally supplied by Century Petroleum, such as Mobil Lubricants and Diesel Exhaust Fluid (DEF). We expect this to be a seamless transition of On-Site's accounts into the Century Petroleum fold.

We are excited to welcome the On-Site Petroleum Products customers into the Century Petroleum group of companies!
